

INREACH® GLOBAL SATELLITE TECHNOLOGY

With inReach satellite technology from Garmin, you're never out of reach. These rugged, go-anywhere portable devices empower you and your team to stay connected, even when you're well beyond the range of cell phone towers or line-of-sight radio communications.

All inReach Devices with Professional Subscription Plans Offer These Essential Capabilities*:

- Global two-way communication and team messaging
- Professional 24/7 global SOS monitoring
- 100% global Iridium® satellite network
- GPS tracking with routes, waypoints and map sharing
- Asset tracking to view and monitor your field team or assets
- Weather forecasts available directly on the inReach device
- Professional management website
- Mobile app for pairing the device with smartphones and tablets**

THREE INREACH MODELS ARE DESIGNED TO MEET THE NEEDS OF ANY ORGANIZATION OR TEAM

inReach Mini

Compact, Lightweight Satellite Communicator with GPS

Fit global connectivity in the palm of your hand with our smallest, lightest satellite communicator yet. Weighing a mere 4.23 oz, inReach Mini provides global messaging and interactive SOS plus basic GPS and compass page navigation. It can pair with a smartphone, tablet or compatible Garmin outdoor device to access topographic maps, aerial imagery, U.S. NOAA charts and other advanced features.

inReach SE®+ and inReach Explorer®+

Satellite Communicators with Robust GPS Capabilities

Stay connected when you need to, from land, sea and air. Both the SE+ and Explorer+ include a built-in GPS that enables location tracking and basic navigation with a high-detail breadcrumb trackback trail. inReach Explorer+ adds robust navigation options such as preloaded DeLorme® topographic maps, built-in digital compass, and barometric altimeter and accelerometer.

The internal, rechargeable lithium battery gives up to 100 hours of battery life in tracking mode; up to 30 days in power-save mode (battery life may vary depending on settings) and up to 30 days in standby mode.
